

AURA 30 P

TECHNICAL INFORMATION

Feed: 230 Vac/50Hz
 Dimensions: 742 x 492 x 1800 mm (l x p x h)
 Weight: 80 Kg
 Absorbed power: 150 VA
 Temperature of use: from -20 to +50°C
 Coin acceptor: per 5 currencies
 Banknote acceptor: reads up to 3 value groups in 4 directions
 and the change dispenser in 1 value group.

The automatic Aura30 P cash point has been devised to supply the professional parking implants with a device which allows the maximum functionality and performance for automatic payment.

Aura30 P is equipped with a graphic display in colour, analogical intercom, vocal synthesis, coin acceptor with change giver, Banknote acceptor with change giver of 1 value group (configurable) bacomat/credit card reader with pin-pad, 2d laser scanner for the payment, RFID reader for subscription ticket renewal, thermal print of ticket barcode 2d for both exiting and for subscription tickets.

It is connected to the system via Ethernet connection.

OPERATION

> Short parking payment

The client can pay the parking ticket at the Aura30 P cash point: after having passed the ticket by the 2d scanner the amount is calculated based on the server settings to which it is connected. At this point the client can execute the payment via coins or banknotes and receive the payment receipt and any change in both coins and banknotes thanks to the recycler. Also an online credit card reader is available. The cash point accepts all tickets with discounts issued by the Aura30 T validator.

> Cardboard subscription ticket management

The implementation of the 2d barcode technology allows ticket subscriptions, useful for permitting entrance to the car park for a few consecutive days or subscriptions to increase. Thanks to a simple user menu the client can directly purchase the permitted subscriptions at the automatic cash point, based on the configuration chosen by the manager.

> Subscription management on fixed support

The Aura30 P cash point allows the renewal of subscriptions based on subscription tickets 125KHz, with a magnetic strip and Tuva system using the Aura Token device, a device which, associated with the subscription, can access the renewal payment at the automatic cash point.

ADVANTAGES

Aura30 P offers all of the functions to enable an autonomous operation of a medium-large car park. The cash point has been devised to be installed in a simple and immediate manner. All of the configurations can be executed via the electronic board of the station or remote.

CHARACTERISTICS

- > Display TFT in colour
- > 4 function keys
- > Analogical intercom and vocal synthesis configurable in up to 4 languages
- > Coin acceptor module with change giver 5 currencies
- > Banknote reader 3 value groups in 4 insertion directions
- > Optional change giver module in a adjustable value group
- > Thermal print of fanfold format ticket with module support card up to 2500 tickets
- > RFID reader for Aura Token devices for subscription renewal on a fixed support
- > 2d barcode technology for the emission of subscriptions on paper
- > Control unit on industrial PC and Compact Flash memory at extended temperature.
- > Electronic control of the thermostat allow operation from -20°C a +50°C
- > Credit card reader option with pin pad for electronic payments online
- > Ethernet port for connection to the LAN network of the system

EXAMPLE OF APPLICATION
